Page ???: In formula (6.5) replace \( j = 1, 2, 3 \) by \( j = 1, 2 \):

\[
\{ (p_{0,j}, m_{0,j}, \mu_{0,j}, K_{3,j}) \mid j = 1, 2 \} = \{(0.94, 2, .6, .707), (0.9, 2, .6, 2)\}.
\]  (6.5)

Then replace following sentence by:

Note that the only difference with the Baffler parameters (6.2), (6.3) is an increase in \( \lambda_0 \) and decrease in \( m_{0,1} \) and \( K_{3,1} \).
